

Amazing Animals

Art and design:

What an amazing opportunity to create masterpieces of animals and animal patterns this half term! We can revisit our drawing and painting skills and develop skills in sculpture.

Inspire mathematics:

In maths we will learn about place value within 50 - that numbers are made of tens and ones. This will help us to add and subtract with big numbers!

We will also learn about length & height and mass & volume.

Aren't animals amazing? We will be looking at pets and animals of the UK, particularly those that hibernate for the winter. We will also find out about animals from another continent.

English:

Stories about animals will inspire our writing this term. We can also write descriptions and information texts about animals.

Spring

Personal Development

I have had word that we will be receiving some secret missions from Commando Joe to help Steve Backshall!

We will also do work on families and friendships and media literacy.

Design Technology:

We will develop planning, designing and evaluation skills to create something marvellous with woodwork! We will use saws to cut and nails to join. How exciting!

Computing:

We will use our computing skills to create media content with writing, photography and music.

Science:

We will learn about the care of pets. We will find out about the animals that live in our country and which ones are hibernating right now.

We will contrast them with animals from another continent.

We will learn to label animal body parts and to sort animals into sets according to different criteria.

We will explore how habitats support the animals who live there and look at simple food chains.
